Hootsuite
Vancouver, BC

Dear Hiring Manager,

Hi, my name is Simon Erlic. I am a 4th year Software Engineering student at the University of Victoria, and I am writing to apply for the Software Development co-op position at Hootsuite for the fall of 2024. I always look forward to challenging myself with new technologies and interesting projects, which is why Hootsuite's emphasis on learning and developing technical skills excites me. My previous co-op experiences have allowed me to develop my skills in DevOps, databases, and API development, and I'm excited to expand this knowledge while working at Hootsuite. Co-ops are all about learning, and experiencing different work environments - and I believe that Hootsuite would be a great place for me to continue my learning journey.

I have compiled some of my skills and qualifications below:

Your Requirements

Experience in shipping code and collaboration

Creativity and Innovation

A drive to complete things because you want to, not because you have to

My Qualifications

At both of my previous 8-month co-op positions, I had the chance to directly contribute code that made it into production. During my most recent co-op, I was given the opportunity to work with UI/UX designers and product owners to develop a new feature for our product. All of this has taught me how to work with a team to deliver a feature that meets and exceeds the needs of our end user.

I strongly believe that a good software engineer writes simple, but effective code. I have always been interested in finding new ways to solve common problems by thinking out of the box. By simply applying some creativity to my work, I like to think that what I build is not only functional, but also joyful to use.

I'm a firm believer in the idea that if you truly enjoy what you're doing, you'll never work a day in your life. Ever since I was a kid, I've been fascinated by *creating* things - and software just so happened to be the medium that I fell in love with. I bring that same passion to my work, finding joy in the process of software development - everything from building something from nothing, or solving a problem that has been bugging me for days.

I would greatly appreciate the opportunity to meet with you to discuss how my qualifications and experience tie into the open coop position. I can be reached at (250) 857 5479 or simon@erlic.ca.

Thank you for your time and consideration.

Sincerely,
Simon Erlic
